## The cornerstone of strategic global sourcing

# Horizon Sourcing<sup>™</sup>

#### Powerful integrated global information with unique analysis

#### How you benefit >>

- Monthly data updates
- Intuitive, easy-to-use web technology
- Comprehensive training and technical support
- Flexible licensing options
- Zero cost deployment
- Secure, confidential access

#### Where you can use it >>

- Strategic planning
- Business development
- API sourcing and sales
- Product intelligence
- Company intelligenc

See who is involved in producing a partcular API, what type of company it is and what stage of development or manufacturing the product has reached.

#### Promote superior, earlier decisions

Horizon Sourcing<sup>™</sup> is an expert competitive intelligence system for generic pharmaceutical companies and strategic API (Active Pharmaceutical Ingredient) manufacturers.

Powered by unique early intelligence and analysis available only from Thomson, the industry authority on global API development activities, *Horizon Sourcing* contains detailed profiles of over 10,000 active ingredients, 18,000 corporate groups and 3,500 API production sites worldwide.

- > Identify early, exclusive or alternative sources of API supply ahead of the competition
- > Leverage unique competitive intelligence on suppliers and developers of API worldwide during sourcing negotiations
- > Determine potential suppliers based on specific technical and manufacturing capabilities
- > Monitor patenting activities of API manufacturers worldwide
- > Investigate products and analyze patent, exclusivity and regulatory information

## Powerful, integrated global information

- > Unique early API development intelligence and competitive forecasts
- > Coverage of over 10,000 active pharmaceutical ingredients
- > Worldwide patent families and patents by country filed by innovators, API manufacturers, and generic companies together with US and European exclusivities
- > US Drug Master File, Orange Book and European Certificate of Suitability data
- > Comprehensive Supplementary Protection Certificate (SPC) data for Europe\*
- > Chemical structures and potential routes of synthesis
- > Profiles of 18,000 corporate groups and 3,500 API facilities including detailed manufacturing capabilities for an increasing number of producers
